

# LB3-P5e

Little Board™/P5e • Exceptional performance, high integration EBX compliant single board system

The Little Board/P5e sets the standard for Pentium-based embedded-PC designs. The extreme power of an Intel Pentium processor is combined with the high bandwidth of a PCI expansion bus, in a rugged and reliable single-board solution for embedded applications that demand small size, low power consumption, and high functionality.

This new high-end member of the popular Ampro "third generation" Little Board family contains—on a single compact assembly—all the functions of a fully configured PC-compatible system. Included in this highly integrated design are disk, display, network, and SCSI controllers, plus four serial ports and an enhanced parallel port.

## **HIGH PERFORMANCE AND RELIABILITY**

The Little Board/P5e meets the performance and reliability demands of a wide range of fixed, mobile, and portable embedded applications. Compact size, reduced power consumption, wide operating temperature, high quality,

and rugged construction all make the Little Board/P5e the optimal choice for use in punishing embedded environments. Additional reliability enhancements include a watchdog timer, a power-fail NMI generator, and an onboard bootable "solid state disk."

## **ENHANCED VIDEO SUPPORT**

Now the Little Board/P5e offers up to 2 Mbytes of video RAM which supports high resolution and true color modes for graphics intensive applications.

A powerful and highly flexible PCI-based display controller interfaces with both flat panels and CRTs, and offers full compatibility with five popular video modes: VESA (SuperVGA), VGA, EGA, CGA, and MDA. Software programmable flat panel interface timing accommodates nearly all LCD and electroluminescent (EL) displays.

# LB3-P5e

## SPECIFICATIONS

### PC FUNCTIONS

- CPU**
  - Intel Pentium, 133 MHz VRT, 166 MHz MMX, 200 MHz MMX, 233 MHz MMX
  - 256K level two cache
- MEMORY**
  - Supports up to 128 Mbytes, Fast Page or EDO DRAM
  - Supports two 72-pin SIMMs (1 bank) with or without parity
  - Shadow RAM support provides fast system/video BIOS execution
- DMA INTERNAL**
  - 15 interrupt channels (8259 equivalent)
  - 7 DMA channels (8237 equivalent)
  - 3 programmable counter/timers (8254 equivalent)
- KEYBOARD**
  - Standard PC/AT keyboard port
  - Speaker port with 0.1 watt output
- REAL TIME CLOCK BIOS**
  - Battery backed real-time clock and CMOS setup
  - Award ROM-BIOS with Ampro enhancements (See Ampro Embedded-PC Enhancements section)

### ADDITIONAL ONBOARD FUNCTIONS

- SERIAL**
  - Four FIFO-buffered serial ports with full handshaking (16550 equivalent)
  - Each channel supports either RS232C (direct connection) or RS485 (via the Ampro RS485 Adapter)
- PARALLEL FLOPPY**
  - EPP/ECP compatible, bidirectional parallel printer port
  - Supports 1 or 2 drives
- PCI ENHANCED IDE**
  - Supports up to four drives
  - Supports "fast" IDE data transfer modes
- PCI ULTRASCSI**
  - Adaptec AIC-7860
  - Supports SCSI I/II, "UltraSCSI" (20MB/sec), synchronous or asynchronous transfers
- BYTEWIDE SOCKET**
  - Usable with 32K-1M byte EPROMs, 32K-512K byte Flash EPROMs, 32K-512K byte SRAMs, or 32K-512K byte NOVRAMs
  - Offboard battery converts SRAM into NOVRAM
  - Usable with DiskOnChip2000™ read/write flash SSD device
- CONFIG EEPROM**
  - Supports battery-free boot capability
  - 512 bits available for OEM use
- WATCHDOG TIMER**
  - Utilizes real time clock alarm function
  - Timeout triggers NMI or hardware reset
- POWERFAIL NMI**
  - Triggers when +5V power drops below +4.7V

### PCI DISPLAY CONTROLLER

#### CONTROLLER ONBOARD DISPLAY RAM FLAT PANEL SUPPORT

- Supports CRT, LCD, and EL displays
- C&T 65550
- 2 MBytes
- Supports 24-bit "true color" (800 x 600)
- "GUI accelerator" for enhanced graphic function performance
- Software programmable flat panel interface signal timing
- Sequenced LCD power to protect display
- Supports DPMS-compatible displays
- Optional plug-in LCD bias supply: supplies  $\pm 15$  to  $\pm 35$  VDC @ 30 mA; voltage level adjusted via onboard or external potentiometer

FOR A COMPLETE LIST OF PANELS SUPPORTED, PLEASE VISIT OUR WEBSITE [www.ampro.com/support](http://www.ampro.com/support)

### ETHERNET LAN INTERFACE

#### CONTROLLER MEDIA INTERFACE OPTIONS

#### DATA RATE REMOTE BOOT ROM

- Complies with IEEE-802.3 (ANSI 8802-3)
- SMC 9000 series
- 10Base-T (twisted pair), via onboard RJ45 connector
- AUI, via onboard header connector: DB15F transition cable available
- 10Base2 (thin coax), via external MAU connected to AUI interface
- 10M bits/sec
- Can be installed in byte-wide SSD socket

For ordering information and pricing please refer to Ampro Ordering Guide.

### MECHANICAL

#### SIZE POWER ENVIRONMENTAL

- 5.75 x 8.0 x 1.2 in. (146 x 203 x 30 mm)
- Power requirements: Contact factory
- Operating temperature (Please refer to the *Ampro Ordering Guide*.)
- 5% to 95% relative humidity, non-condensing
- Storage temperature:  $-55^{\circ}$  C to  $+85^{\circ}$  C
- Weight: 11.6 oz. (329 gm)

NOTE: Contact Ampro regarding custom configurations and special order options.
